

SEMPER

1st International Workshop on Semantic Web Technologies for
Mobile and Pervasive Environments

Co-located with ESWC2016

29th May, Anissaras, Greece

Preface

Pervasive and mobile technologies are one of the leading computing paradigms of the future. Transitioning from the world of personal computing, powerful, compact devices are distributed across the user's environment, enabling the contextualized enrichment of business processes with the ability to sense, process and combine data and forming smart environments of Ambient Intelligence (Aml). This interconnection of devices, machines and "things" enables the dynamic generation, analysis and communication of multiple data types so that the operational efficiency and effectiveness of existing business processes are increased.

However, the integration of devices and services to deliver intelligent solutions, in the so-called Internet of Things (IoT), may have been partially addressed with open platforms (FIWARE, Kaa, Linked Sensor Middleware), but yet imposes further challenges, relevant not only to the heterogeneity of communication protocols and interfaces, but also to the diverse context-aware information exchange and processing capabilities.

The SEMPER workshop aims to address emerging challenges in the field, discussing the benefits and limitations of applying Semantic Web technologies, with a special emphasis on semantic interoperability, context-aware modelling, hybrid reasoning schemes and intelligent decision making, real-time analytics, fusion of data sources and leveraging Big Data, sensor integration and reference platforms.

Workshop Organizers

Dr. Georgios Meditskos, Information Technologies Institute, Centre for Research and Technology Hellas, Greece

Dr. Thanos G. Stavropoulos, Information Technologies Institute, Centre for Research and Technology Hellas, Greece

Dr. Antonis Bikakis, Department of Information Studies at University College London, UK

Program Committee

Grigoris Antoniou, University of Huddersfield, UK

Nick Bassiliades, Aristotle University of Thessaloniki, Greece

Sotiris Batsakis, University of Huddersfield, UK

Francois Bremond, INRIA Sophia Antipolis, France

Ceyhun Burak Akgul, Vispera Information Technologies, Turkey

Oscar Corcho, Universidad Politecnica de Madrid, Spain

Luca Costabello, Fujitsu Linked Data Research Team, Ireland

Carlos Crispim-Junior, INRIA Sophia Antipolis, France

Stamatia Dasiopoulou, Pompeu Fabra University, Spain

Anna Fensel, University of Innsbruck, Austria

Nikolaos Georgantas, INRIA Paris-Rocquencourt, France

Elias Karle, University of Innsbruck, Austria

Ioannis Kompatsiaris, Centre for Research and Technology Hellas, Greece

Efstratios Kontopoulos, Centre for Research and Technology Hellas, Greece

Kostis Kyzirakos, Centrum Wiskunde & Informatica, Netherlands

Lionel Medini, Universite Claude Bernard Lyon 1, France

Theodore Patkos, FORTH, Greece

John Soldatos, Athens Information Technology, Greece

Ahmet Soyly, Norwegian University of Science and Technology, Norway

Giorgos Stamou, National Technical University of Athens, Greece

Giorgos Stoilos, National Technical University of Athens, Greece

Kåre Synnes, Luleå University of Technology, Sweden

Athena Vakali, Aristotle University of Thessaloniki, Greece

Antoine Zimmermann, ICADE, France
